Trap25 Spam Protection

Powerful Spam Filtering & Anti-Virus

Making use of our custom-built anti-spam system codenamed Trap25, 3DPixel can offer you a massive reduction in the amount of spam your network receives.

Prevention of dictionary attacks, mailbombs, backscatter via a combination of validrcptto, nolisting, greylisting, Auto-whitelisting, RBL-blacklists and finally spamassassin with custom 3dpixel.net rules.

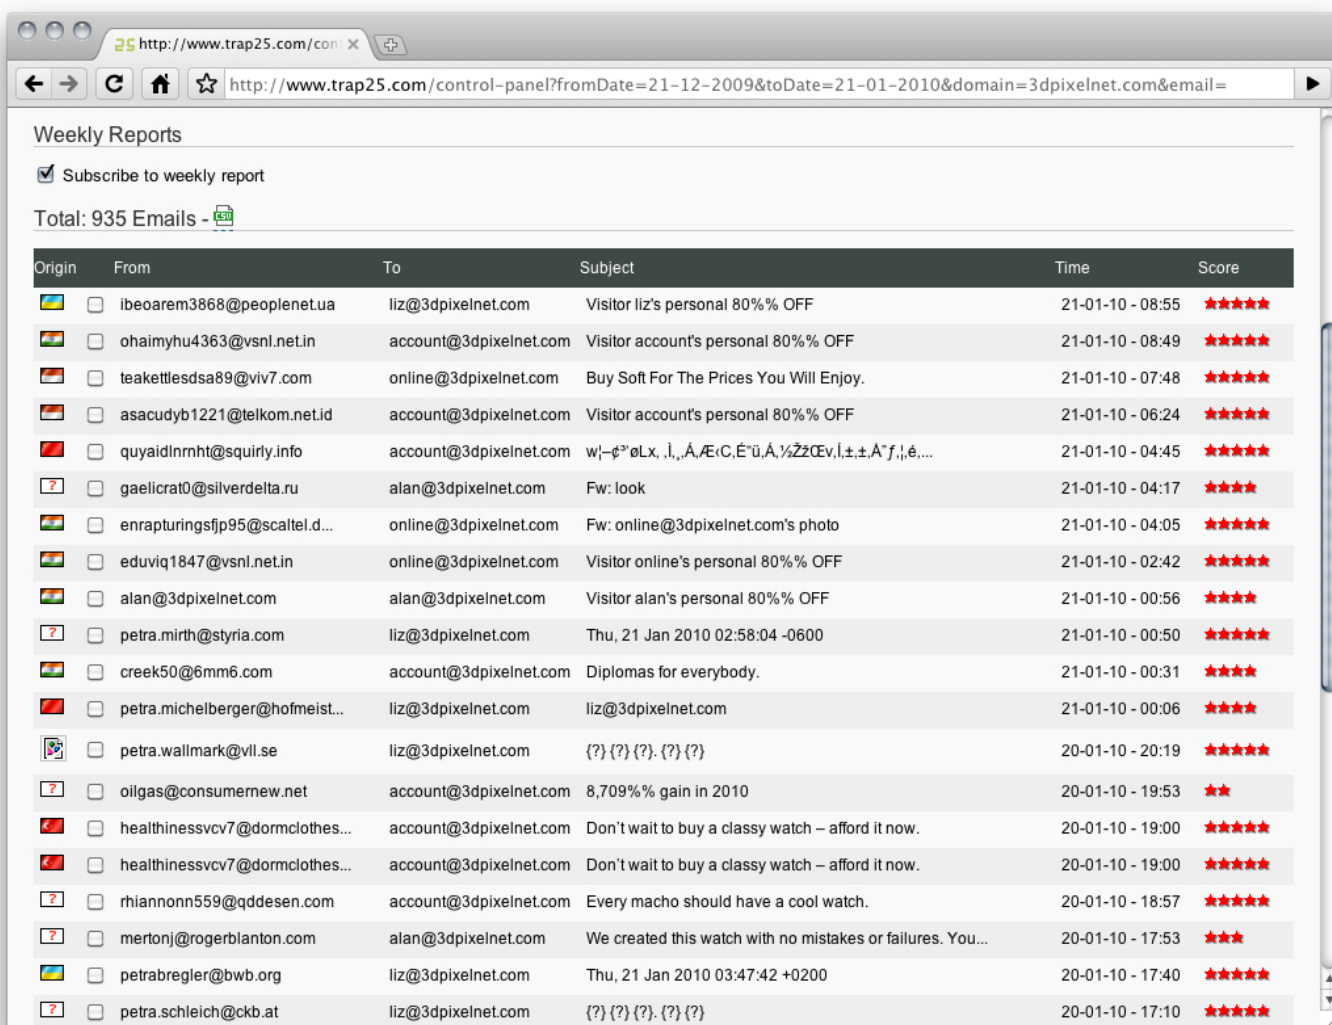

Reporting & Spam Release System

Blocked emails are displayed via an online interface. The domain / email administrator can log in and release emails to the original recipient, or indeed to the administrator first for investigation purposes or verification.

The following columns are present in the interface.

- Country Flag For Email Origin
- Sender
- Recipient
- Subject
- Time Of Email
- Trap25 Spam Rating

Weekly Reports

Technical Information

No Change To Internal Systems

Trap25 was designed to have minimal impact on your current email delivery systems.

Changes to individual machine settings are NOT required.

Trap25 is an MX spam filter. This means that mail is intercepted before it reaches your network.

MX Backup

The nature of the Trap25 system means that the platform also acts as an MX backup for your network.

Email delivery is dependent on an active internet connection and suitably active recipient mailserver. Thus if your network or mailserver has technical difficulties that makes email delivery impossible, Trap25 will store the email for up to 7 days, re-attempting delivery all the time.

Contract & Pricing Information

Contract Information

We offer a no questions asked, 30 day full trial of the system.

Contract length is then paid pro-forma on a monthly basis.

Pricing Information

Price per month: **£1 exclusive of VAT** at the prevailing rate per email address.
